

CAMI presents Aeronautical Decision Making and the Importance of Situational Awareness

Everything we do, from how we are feeling to how we conduct the preflight, affects how we perform in the cockpit when we go fly. In this seminar, explore the importance of Aeronautical Decision Making and how it relates to situational awareness both on the ground and in the air. Situational Awareness is the ability to identify, process, and comprehend the critical elements of information about what is happening to your flight. More simply, it's knowing what is going on around you.

Directions: DRIVE IN - Two miles south of Wilsonville, just off I-5. 1/4 mile south of Arndt Rd.
FLY IN - Taxi to the very north end of the Aurora airport. Park on the ramp between the fuel island and the FBO building.
AVOID OVERFLYING POPULATED AREAS.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
